

RMBC64/24D

Multiple Hawk Battery Charger

The **RMBC64/24D** has been designed specifically to rapid charge two **HAWK** batteries at once.

This unit can charge both batteries flat to full in less than 5 hours

Built from 2mm ruggedized aluminium with removable front cover and rear flap in which the mains and charging cables can be stored.

Operation is very user friendly, controlled by the push of two buttons. A full diagnostics check of the batteries is carried out prior to the charge commencing. Five rows of LED's per channel indicate the state of charge, when the top row stops flashing and the other four rows extinguish, the batteries are fully charged.

Charging is carried out by the use of 41 pin cables connected between the charger and the batteries. The charger comes complete with mains and charging cables.

All chargers available on 12v batteries.

Technical Specifications

Physical

Case	Armoured Aluminium
Coating	Raylon Nylon
Safety	Timer & thermal cut out
Mains Indicator	Neon lamp
Charge Indicator	LED
Output Socket	2 x 41 pin Sockets
Input Socket	3 Pin
Dimensions	150 x 375 x 410mm
Weight	9 Kilos

Electrical

Smart Mode	Electronic analyser
Input Voltage	110/240 volts AC
Frequency	50/60Hz
Max output power	6 Amps @ 240v
Electronic time out	20 Hours
Charge time	5 Hours Flat to Full
Fuse	8 Amps

NSN 6130-99-3484
